/1/ Consists primarily of statistical revisions to the NIPAs that have not yet been incorporated into the BLS total factor productivity

/2/ BLS assigns a portion of NIPA proprietors' income to labor income.

/3/ BLS assigns a portion of NIPA TOPI, e.g., business property taxes and business motor

/4/ Prior to the 2016 TFP measures, lines 29 and 30 represented differences between the NIPA capital income and capital income based on the internal rental prices for four financial industries.

Starting with the 2016 TFP measures, these differences between the NIPA capital income and capital income based on the internal rental prices have been reconciled and BLS adjustment to property income for finance and insurance industries are now zero.

NOTE. Estimates from the BLS total factor productivity accounts reflect BLS estimates which were released on March 23, 2023.

The BEA estimates incorporate the results of the 2022 National Income and Product Accounts (NIPAs) and Industry Economic Accounts (IEAs) annual update, released on September 29, 2022.
